

Supported by

NATIONAL WORK AT HEIGHT CONFERENCE

Implementing **change** and **innovation** in work at height

From drones to designing for access and the role of technology to the implications of Brexit, this unique event will bring together an exceptional line up of expert speakers to address the issues and topics set to shape the future of work at height.

Six reasons to attend

- Add to your knowledge and skills in this critical area of health and safety
- Hear from recognised specialists with unrivalled knowledge and expertise
- Gain insights into the key topics set to influence the work at height agenda
- Get clarity on the latest and impending standards, guidance and legislation
- Share facts and information and contribute to high level panel discussions
- Be the first in the know and stay one step ahead

Who should attend?

Anyone with responsibility for setting, implementing or advising on height safety, or directing and managing work at height on a day-to-day basis. From company directors and managers to health and safety professionals - across a wide range of industry sectors - this conference has something for everyone.
